ABOUT ME

Versatile Software Developer with 3+ years of experience in Object Oriented Programming and software design. Self-taught programmer, passionate learner and contributor with expertise in Data Structures & Algorithms.

EDUCATION

BTech in Electronics & Communication

ABES ENGINEERING COLLEGE
Graduated June 2019 | CGPA: 8.04

Senior Secondary

Dehradun Public School
June 2015 | Score: 85%

HONORS & AWARDS

- Oct 2020 - Awarded Capgemini's Rising Star for H1-2020 for demonstrating strong work ethics and contributing innovative ideas.
- Dec 2019 - Led a team of 6 in the development of Quote Generation System using Java, Servlets, JDBC, HTML, CSS and Bootstrap.

SKILLS

Problem Solving • Java • API Design • Spring Boot • Microservices • C++ • Guidewire • SQL
Familiar: HTML • CSS • Bootstrap
Other: Data Structures and Algorithms • High Level Design • Low Level Design

CERTIFICATIONS

- Oracle Certified Associate, Java SE 8 Programmer
- Automation Academy Certified Automation Engineer Practitioner

EXPERIENCE

Deloitte | Business Technology Analyst April 2021 - Present

- Designed and developed batch jobs to upload excel and csv files from UI including medical and NAICS codes, improving data import time by 70%
- Developed Claim Search functionality that fetches claims based on various search parameters.
- Worked on Guidewire platforms like Claim and Policy management systems. Was responsible for drafting design documents and enhancing several existing functionalities to accommodate client requirements.
- Developed critical story cards involving configuring various UI screens.
- Developed microservices using Java in Spring boot Framework using REST API and JPA Repository. Used Postman to test the API behavior.
- Implemented GX model solution facilitating automated generation of 200+ policy and billing documents by transferring business data to content management system on specific events using Apache Kafka.
- Single-handedly set up the accelerator code for SmartComm system within the Guidewire application (which is ideally performed by SmartComm team), which helped in project's cost cutting and resolved dependencies.
- Triaged and resolved major defects/blockers helping team meet deadlines.

Capgemini | Senior Software Engineer Oct 2020 - April 2021

- Worked on publishing and consuming REST APIs using Java and Spring boot as an Integration Developer in Insurance domain.
- Automated Exception Tracker: Reduced test environment exception tracking time by 83% by implementing a python-selenium based script leading to faster bug resolution.
- Performed code optimizations on legacy codebase using best practices.

Capgemini | Software Engineer Jan 2020 - Oct 2020

- Agency Management System: Implemented Spring batch job that generates XML Policy reports to send over to subscribed agents.
- Underwriting Issues: Designed and tested batch processes that block policy issuance according to various underwriting rules.

PROJECTS

Nationwide Claims | Configuration Developer June 2022 - Present

- Led the configuration/frontend for the Claim Center enhancement.

Commonwealth of Pennsylvania | Integration Developer April 2021 - May 2022

- Designed and developed backend framework for Claim and Policy Centers.

State Auto Insurance | Integration Developer Jan 2020 - April 2021

- Enhanced Policy Center and integrated with Billing Center.

COURSEWORK

- Scaler: Scaler Academy Course (Jan 2023 - Present)
- Unacademy: Competitive Programming & Problem Solving (Jan 2021 - Jan 2022)
- Udemy: Master Microservices with Spring Boot (Aug 2022)
